

THE GLEICHEN CALL

VOLUME 39 NO. 32

Authorized as second class mail, GLEICHEN, ALBERTA, WEDNESDAY OCTOBER 23, 1946

SUBSCRIPTION \$2.00 PER YEAR

Why The \$30,000 By-law Should Be Passed Monday

Next Monday the taxpayers of Gleichen will go to the polls to decide in a democratic manner whether or not the town authorities shall borrow and spend \$30,000 for the renewal and extension of the water works system to provide adequate and efficient service for her citizens.

This sum of \$30,000 is a very modest sum for a town like Gleichen to spend on such an important service as its adequate water works system. Such a system would bring much benefit and comfort to the citizens in our community and also do a great deal to advertise our town as a forward-looking and progressive community. But the vote will reveal something else also. It will give the town fathers the green light to go ahead and place the affairs and management of the town along the lines of a liberal progressive policy. That is if they all the rest of the question which we are asked to decide next Monday.

In this post-war world of ours many towns and communities are adopting progressive and even aggressive plans for the establishment and modernization of its utilities. Some have secured franchises for gas services, others, like Gleichen are planning a good water works system, and still others, are looking for electric light services. Gleichen is fortunately and advantageously situated in this respect and has an advantage over many other towns in the west. We have everything that can make such an undertaking a real success. Our difficulties in the way are but minor ones.

It is a certainty that our citizens will not wish to see Gleichen outdistanced by neighboring towns in her plans to make it the best possible kind of town. Rather, we will want to be in a strong position to make a bid for some of the people who have worked hard and long during the war on the farms and are looking forward to some years of well-earned retirement in a quiet, progressive community that can afford them most of the comforts of city life unaccompanied by the noise, hustle and haste that is found in every city. They will find Gleichen with its good electric light service, its irrigation system and its water works system and fire protection much to their liking. This will bring more trade, more business and more paydays into the town. And that always helps a town as there are more to share the burdens of taxation.

Past experience points to the fact that under good management and system of water supply can be made to do a little better than pay its own way. It would appear as if it would not raise the mill rate to the taxpayer one iota, but if it brings additional families into the town to help share the burden of taxation would work in the opposite direction—that of reduction rather than increase. From the information published in this paper under date of September 25 we gather that the inadequate system we have has shown a surplus over expenditures amounting to more than one-fifth of the sum mentioned in the money by law we are asked to endorse. It looks like a good investment and a splendid thing for the town to vote to use this money by law.

Running water is one of the real boons to housewives in this country where the winters are severe. Those people who have established their own private system here, witness it. But we do not doubt will wish to see that blessing extended to all the citizens in the community. Many of them are not in a position to extend their own private system and in any case it would not supply the added fire protection we need.

But most of all, it will meet a crying need of this progressive and growing town. We shall say nothing of the chances that better fire protection and water service is likely to attract other industries, such as restaurants, etc. But we do feel that it is none too soon to get away from the pioneer methods of seeking the essential water supply by going into the muddy back yard and using his pump, which may be a block away. Running water in the house does more than anything else to add to the comfort of living and make life more worthwhile. Let's look and vote for progress.

WATERWORKS PLEBISCITE MONDAY, OCTOBER 28

Next Monday the rate payers are asked to vote on a money by-law authorized by the council to borrow \$30,000 for the purpose of renewing and extending the water system

Vote: YES

W. SUTERMEISTER, Mayor.

It is becoming clear that the leading issue in Canada's home political scene will be the question of price and wage controls involving as it does such problems as (1) the extent of the government's responsibility for the conduct of business whether it be business by publicly owned corporations, provincial and municipal business by corporations, by private individuals or by cooperatives; (2) the extent of the government's responsibility for the conduct of labor unions; (3) the extent of the government's responsibility to find markets particularly for farm products but also for farm products, of mines, fisheries and forests. Public opinion will be the deciding factor. In the issue and already there are signs of the lining up of forces.

Those who argue in favor of the government policy claim that it brings the greatest measure of economic freedom to the masses and stimulates the creative initiative of all and particularly of our young people. They point to the previous experience of this previous past war period of 1919 and the early 1920's and when the conservative party was in power and carried out the policy now advocated by the Progressive-Conservative. The real income of both farmer and labor—measured in terms of the goods they dollars could buy—went to a new low. This was quickly followed by a sharp reduction in the price of farm products and loss of jobs for labor, bringing hardship to all but particularly to our young people not yet well established in jobs or business.

One more million more persons are gainfully employed at this date than in 1930.

Experts consider that the physical reconstruction of industry to peak time production in two thirds complete now after one year of peace.

Tax exemptions are higher, than

in Canadians have larger exemptions than in Great Britain, Australia, New Zealand or United States. Further exemptions commence January 1. Plans for the International Conference on world trade are rapidly taking shape and indicate an awareness of the importance of trade to the success of the world. Canada is particularly dependent on export markets and thinking Canadians' realize the importance of getting markets now while the demand for our products is great. Channels of trade change slowly and markets obtained now will mean a great deal to our farmers and workers when goods are more plentiful and harder to sell.

Bert Reid has returned home from a Calgary hospital where he underwent an operation for gonorrhea. He says he already feels a lot better.

The old style serial moving pictures are back again with their fast moving action. And judging by the interest displayed by the audience they are just as interesting now as they were years ago. Mr. Black, local picture man states the serial will run for some weeks and should create interest to those who love thrilling westerns.

Alberta is to have a white center strip on its main highways as a further precaution against accidents, according to information received by the Alberta Motor Association. This new marking will commence in the southern part of the province and will be advanced as far as possible during the current season. Provincial officials feel that the center strip which is used extensively in the U.S. will be a distinct aid to safe motoring in the province. Another step is to place a layer of light sand on the black top surface of the main highways.

It is expected to meet the objection of motorists to the black top which, they claim, had the effect of darkening the effect of headlights. With a fine light and in use, the lights will function more efficiently when a car is being operated over black top surfacing. Provincial officials also say that the sand will be worked into the black top and serve to improve and strengthen the surface before the final bent surfacing is laid.

ST. ANDREW'S CHURCH
Sunday, October 27th.
Evening, 7:30 p.m.
Rev. D. A. Ford R.A., Incumbent.

Town & District

Mr. and Mrs. J. Grant have moved into the house vacated by Mrs. Serles.

Mrs. H. E. James is up present confined to the Basano hospital where she underwent an operation last week.

Mr. and Mrs. T. H. Beach returned during the weekend from a visit to their son Pat in Saskatchewan.

An airplane paid Gleichen a visit Sunday afternoon for several hours. The visitors landed in J.O. Bogies field and left for home at dusk.

Mrs. P. Mahoney arrived in town Monday night to spend a day or two visiting her friends. She is the guest of Mrs. Ed. Mowbray.

Three fire alarms Sunday night brought about 10-30 brought the town to life. After the excitement had died down all were thankful there was no fire.

Mrs. W. Service and family left last week for Red Deer where they will be in residence. They have been residents of the town for many years and Mrs. Service and the children are to be joined by their many friends. Mr. Service is an instructor in the army at Red Deer.

Major and Mrs. A. F. Parkinson returned from Toronto Sunday morning where they attended a meeting of the Salvation Army. They were away two weeks and the Major states that he and Mrs. Parkinson thoroughly enjoyed the trip.

Mayor and Mrs. W. Sutermeister attended the 25th anniversary of the Lethbridge Southern Irrigation District at Lethbridge and saw the official opening of St. Mary's River dam project. While in Lethbridge they met Mr. and Mrs. James Black now living at Valour. While the ladies were in Lethbridge Mr. Sutermeister, ex-hon. C. Hon. C. D. Howe, Minister of Agriculture and Hon. E. G. Macdonald, Minister of Alberta and Minister of Business addressed the meeting. All paid a visit to the Raymond Dam and saw the new bridge made two spans after which lunch was served in the upper house. Later they paid a visit to St. Mary's dam site and

were shown the work being done on the river diversion tunnel which was being bored through solid rock. In the evening a banquet was served in the Marquis Hotel at Lethbridge. Mr. Sutermeister states the trip was well worth while and he learned many things.

CANADA SAVINGS BONDS FOR SALE
Your BEST investment
Canada Savings Bonds, like the famous wartime Victory Bonds, are backed by Canada itself.
Cashable at full value (including accrued interest) by this Bank at any time.
BUY CANADA SAVINGS BONDS AT THE NEAREST BRANCH OF THE CANADIAN BANK OF COMMERCE—for cash—on a monthly savings plan—or on other suitable terms.
Denominations: \$50, \$100, \$500, \$1,000.
The CANADIAN BANK OF COMMERCE
The Bank will make delivery of all Bonds on 15th October, or at soon thereafter as full payment for them is made.

Melrose ORANGE PEKOE TEA

To bring out the full, rich flavor of this delicious blend—

- 1.—warm the tea-pot.
- 2.—use boiling water—jumping boiling!
- 3.—infuse at least six minutes.

A Tribute To Canada

THE MANNER IN WHICH PEOPLE of many races have come to this country and lived together in peace and harmony as Canadian citizens, stands as an example of what could be accomplished on a much larger scale among the nations of the world. Canadian culture has been said to be an amalgamation of all the best which has been brought here by people from other lands. In Canada, racial prejudices and language and class barriers have been submerged, while much of the finest in music, art and other forms of expression in many divergent races, has combined to benefit the cultural life of this country. Among all ranks of Canadians, statesmen, professional men, educators and those engaged in various forms of the arts, few outstanding citizens whose racial origins go back to all parts of the Old World. Regardless of this, they work together, as citizens of Canada, for the welfare and advancement of the nation.

Is An Example To The World

For many years Canada has been cited as an example of what could be achieved in building permanent peace among the people of the world. The latest tribute of this kind, came from the Right Honourable Viscount Addison, British Secretary of State for the Dominions, who recently made an extensive tour of Canada. During this tour, Lord Addison addressed audiences in a number of centres and on each of these occasions he advocated what leading statesmen of all nations are now urging, namely that the interests of the United Nations be held above those of individual states and groups of people, in the cause of an enduring world peace.

The War Taught Need For Unity

Lord Addison emphasized the fact that the war has taught the people of the world the value of unity as a basis for lasting peace. In this connection he said: "All the great projects on which we could make progress, and are doing so far as opportunity allows, are only possible on one condition, and that is that we have for a basis of every scheme security for the people. I believe every man in every country wants to be able to pursue his life free from the dread of war, and I would like to say that I think the lesson of Canada—in which large numbers of different races, preserving their own ideals and their own teachings and their own languages are living together in a great unity—is a lesson the world should learn." Canadians should be proud, indeed to stand such an example for peaceful co-operation among people at this crucial period in world affairs.

IT COULD BE DONE

Not Too Much To Hope United Nations May Yet Outlaw War
Gen. Eisenhower says he thinks the time has come when humanity is intelligent enough to do away with war. He says both the atom bomb and war itself should be outlawed.
Gen. Eisenhower's sincerity is not open to doubt, comments the Buffalo Courier-Express. If his sincerity and faith in the intelligence of humanity could be infused into all United Nations delegates, something constructive would result.
Inasmuch as the people of no nation want war, it shouldn't be beyond the realm of possibility for the United Nations to take action designed to outlaw war effectively—and this time for keeps.
It may be too much to hope, but we are not yet ready to concede that.

For Stamp Collectors

Australia Has Special Service Which Would Be Appreciated
Anybody who has been to Australia for the first time in Australia post office history, the eager and fastidious stamp collector can post his letters, secure in the knowledge that the stamps will not be defaced in the post-box. In Sydney, a new mail-box has been added with the classification—"Philatelic Mail Only."

Post office authorities explained that the ordinary machine "post-marking" was sometimes too heavy for the requirements of philatelists. Letters placed in the special box will be carefully stamped by hand. Since the box was installed, an average of 11 letters a day have been posted.

BUGS BEST FLIERS
SAYS DETROIT ENGINEER
LOS ANGELES—William B. Stout, an engineer, debunked the notion that birds were nature's best fliers. He said bugs could fly circles around them.

Even the common house fly can fly better than a bird, Stout said. "Did you ever see a bird that could land upside down on the ceiling?" he asked.

Stout, a Detroit consulting engineer, showed the Society of Automotive Engineers' national meeting his version of the oriole, a fast, winged aircraft built to fly like a bug.

GEMS OF THOUGHT

METHOD

The first idea of method is a progressive transition from one step to another in any course.—Coleridge.
Method is not less requisite in ordinary conversation than in writing, provided a man would talk to make himself understood.—Addison.

Be methodical if you would succeed in business, or in anything. Have a work for every moment, and mind the moment's work.—W. Matthews.
Method facilitates every kind of business and by making it "easy" makes it agreeable, and also successful.—C. Simmons.

The easiest way to do many things is to do only one thing at a time.—Cecil.

The poet's line, "Order is heaven's first law," is so sternly true, so axiomatic, that it has become a truism; and its wisdom is as obvious in religion and scholarship as in astronomy or mathematics. — Mary Baker Eddy. 2605

NEW FASTER ACTING ROYAL DRY YEAST

Add New Fast Rising Royal to water. It starts working in 10 minutes!

New Granule Form Saves Time! Saves Work! Scores New Baking Success!

No fussing with "setting bread" the night before when you're tired and "not up to it." No risk of overnight baking failure because of temperature changes. New Fast Rising Royal lets you do your whole baking in a few hours in the daytime when you can watch the dough. New Fast Rising Royal stays full-strength, ready for use on your pantry shelf for weeks. Try New Royal Fast Rising Dry Yeast today. At your grocer's.

WOULD BE SOMETHING

First it was a gawdie boy who would run 50 miles an hour, and now it is six gazelle boys, each of whom can run faster than the preceding one. For our part, says the St. Louis Post-Dispatch, we are waiting for a gawdie boy who can run as fast as a rumor.

Potatoes Increase

Yields Of Sugar Beets, Dried Peas And Corn Also Higher
OTTAWA—Substantially increased yields of potatoes, sugar beets, dried peas, and corn, but a reduction in the output of alfalfa for the 1946 crop season was reported by the Dominion bureau of statistics in its first estimate of root and late crop production for the year.

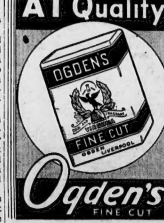

The 1946 potato crop, the bureau said, was estimated at 47,000,000 hundredweight, and was substantially above the 36,000,000 hundredweight crop of a year ago. Average yield was 90 hundredweight per acre, with New Brunswick having a top yield of 150 hundredweight per acre.

Quebec and Manitoba potato crops were lower this year than last, but the total 1946 Canadian crop is the largest since 1934, with the exception of 1944, the bureau said.

The commercial sugar beet crop for 1946 was 58,000 tons above the 1945 output, the bureau said. The increase was due not only to increased acreages, but above average yields.

Production of dry peas in Canada this year amounted to 2,222,000 bushels, compared with 1,852,000 bushels a year ago. The alfalfa crop was reduced to 3,260,000 tons—417,000 tons less than a year ago.

A1 Quality

There goes that word again

There's a word going the rounds in Canadian tea circles today. Perhaps you've heard it. It's *break*. The word experts use to describe the favour of Lipton's Tea.

There's new and finer tea pleasure... new and deeper tea enjoyment... . Waiting for you in your first cup of Lipton's Tea... the tea with that *break* favour, never dull, always fresh, lively and full-bodied. Change to *break*-tasting Lipton's Tea today.

MAKES A BETTER CIGARETTE

OUR COMPLETE SHORT STORY—

UNCLE JOE GETS A FALL

By M. T. COLLINS

Copyright
Western Newspaper Syndicate

UNCLE JOE has more complaints than half a dozen ordinary men. There's not an ache or pain that man's burdened with but he's sure to catch it or be sure he's going to catch it. Rheumatism and his heart are his favorite ailments. Then he has his seasonal maladies, such as hay fever in summer and for the least thing during the winter, he's sure to catch a 'cold'.

In the kitchen the eight-day clock is almost crowded off of the large shelf with his medicine bottles, pills and potions; but going to a doctor was something he wouldn't even consider.

THROAT SORE?

JUST RUB ON

MINARD'S

ROSE OF SHIRAZ

LINIMENT

WELL! IS THIS GOING ON FOREVER?

Ill-temper, nervousness, sleeplessness— with some people all of these can be traced to the tea and coffee they drink. They should drink Postum! No caffeine—no other stimulants—and a grand flavor! Easily made right in the cup with boiling water or hot milk. Costs less than a cent a serving.

A Product of General Foods 3117

Here's Effective, Really Gentle

CONSTIPATION RELIEF!

Don't forget—the same Phillips' Milk of Magnesia that is so widely used for the relief of heartburn, gas or indigestion, is just as wonderful for constipation. Just take 2 to 4 tablespoons of Phillips' with water. You'll be delighted with its effective, yet gentle action. And you'll be ready to start the day feeling on top of the world, thoroughly refreshed and bright. Ask for genuine Phillips' Milk of Magnesia at your drug store. Keep it on hand always. Remember...

ed "Do something quick, I'm falling!" All his frantic efforts to stop his fight were useless. Aunt Martha was so excited that she began jumping up and down like a jack-in-the-box.

"Don't you dare fall off that roof, Joe Quinn!" she gasped sharply. "Don't you dare!" But over the eavesdropper he went.

"The first thing I knew about it was when Aunt Martha phoned. 'Your Uncle Joe just fell off the barn roof!' Her voice crackled with excitement.

"Is he hurt very badly?"

"He says he's dazed, but you know him he's been dazed for over thirty years."

"Don't move him!" I warned. "I'll be right over. Phone the doctor."

"I have, he's on the way out."

Jumping into the car I was over to their place in less than five minutes. As I was backing the car out of the garage my wife Jenny got in beside me.

Aunt Martha was down in the barn yard fusing over her husband. Uncle Joe lay on a pile of straw covered with a blanket. When he saw me he groaned hoarsely.

"I'm gone," he said, "I'm gone. I'll never get over this."

Before I could answer Doctor Falkner came in the gate.

"Don't exert yourself, Uncle Joe, here's the Doc."

The doctor greeted us briefly and quickly made a cursory examination, while Jenny and I stood at the corner of the barn waiting anxiously. Then he drew Martha aside and they conferred in low tones. As far as I could see they looked serious. Uncle Joe kept watching them out of the corner of his eye.

"Help me get him into the house," the doctor said to me as they returned.

"I won't let you up carefully."

We soon had him deposited in the guest bedroom and the doctor made a thorough examination.

By this time Uncle Joe was really shivering. "What's that?" Uncle Joe choked.

"Never mind! You'll take a table-spoonful of it in a glass of water every two hours."

The doctor ignored him. "You'll have to go on a strict diet. No meat, no butter, no eggs, no fruit. I'll send plenty of milk, brown bread and no smoking."

"The doctor sat up in bed. 'What are you trying to do?' He roared. 'Get rid of me? I only fell off the roof. In a healthy man as anyone.'

"Yes, you must certainly rest. And you'll stay in the straw-bed for over fifty years and I ain't fell yet."

"Well, you might," Aunt Martha warned. "You're not so young now."

Uncle Joe opened his mouth to say something but before he could say a word the rotten slatting the creeps was jammed into his face suddenly and he made a wild grab for the rumpole but he was too late and away goes the whole works down the roof.

"Do something, Martha!" he roared.

SMILE AWHILE

Mr. June Wed—"What's wrong with this pie crust, darling? It doesn't fall over the pie!"

Max, June Wed—"I asked your mother how to make pies to suit you and she said to make the crust very short."

Chaplain—How could you have the heart to swindle people who trusted you?

Prisoner—But, Parson, people who don't trust you can't be swindled.

"Now, then, young man," demanded her father irritably, when he called for the fourth time, "what do you want with my daughter?"

"With her, sir? Well you know best what you can afford."

"Do you smile at your troubles as I advised you?"

"You and the boss warned me three times to wipe that grin off my face and get to work."

Kentucky paper: "Anybody around any chicken house in the night will be found there in the morning."

Friend—But isn't your son sort of listless, Mr. Moneybags?

Mr. Moneybags—Heaven, no; he has a list of blondes, a list of brunettes, and a list of red heads.

"The maid is reading our mail, dear," said the wife.

"How do you know honey?" asked the husband.

"Because," replied the woman of the house, "she went and baked a birthday cake right after the mailman brought you a greeting card from Aunt Alice."

Magistrate: "You are sentenced to pay a fine of ten guineas, plus five guineas cost. Have you anything to say?"

Offender: "Father. And if you promise not to increase the fine, I'll say it."

PROPERTY DAMAGE

Canada Experienced 52,173 Fires During 1945

In the year 1945 there were 52,173 fires in Canada causing a property loss of \$41,903,020, according to figures released by Dominion Fire Commissioner W. L. Clairmont, Ottawa.

Across the country the greatest cause of fires was carelessness of smokers. This fault caused 17,082 fires with a loss of \$2,288,430.

An even greater property loss was caused by defective electrical wiring and appliances. These accounted for a loss of \$3,813,153.

Close behind in the list came fires caused by stoves, furnaces, boilers and smoke pipes. These caused 5,664 fires and a loss of \$3,007,855.

Overheated chimneys and flues were responsible for 3,708 blazes, hot ashes, coals and open fires produced 2,558 and sparks on roofs made 1,292 calls for Canadian firefighters.

Other causes of fire were gasoline explosions, lightning other than electric, spontaneous ignition, matches, fireworks, friction and incendiaries.

Robbed of Sleep by Rheumatic Pain

But No Pain Now—After a Few Weeks of Kruschen

"A woman's guide to a happy life of 'such dreadful pain' caused her to write the following letter to me:

"I used to have such dreadful pains in my knees, ankles and shoulders, to say nothing of my back, which used to feel as though it would break. I had no sleep, especially at night. I was taking Kruschen Sels for a few weeks only. I feel a different woman. I feel good now. I have no pains now. I feel much brighter and better in every way and shall certainly continue with Kruschen."

(M.M.) M.R.

Most rheumatic pain and swelling is caused by too much acid in the body. These painful deposits settle in the nerves, joints and tendons, irritate the nerve, and inflame the tissue. Kruschen Sels acts on these pain-making deposits by helping your system to dispose them and to pass them out of your body. This relieves the pain and it's one way you will continue with the little morning dose of Kruschen.

Kruschen is a help against further attacks. Try Kruschen for the relief of rheumatic pains and limbings. 75c and 75c at your nearest drug store.

Life Span Of Fish

Cannot Be Told Accurately But Records Give Some Indications

How long do fish live, if left alone? It is not easy to take accurate indications. The New York Aquarium has a record of striped bass living for twenty years, large-mouthed bass living for eleven years, and whitefish which reached fifteen years.

London Zoological Gardens had a sundfish which reached nineteen years, and there are certified accounts of European trout which lived for fifty-three years in captivity.

Eels in aquariums have lived for fifty-five years. Studies of salmon show that the rate of growth and age of a fish may be judged from the scales.

Creates New Art

Woman In Australia Uses Colored Wools To Make Beautiful Pictures

Twelve years ago Miss B. M. Richardson, an Englishwoman living in Australia, became interested in wool-pictures, not with oils or water colors, but with wools and wools.

Today she has developed a new art: her pictures, painted with Australian wools, are full of life and have fine perspective. She has some pictures of such personalities as John Macneil, Edward Greg, Jean Sibielski and Thomas Edmond.

Black and white portraits such as she does have never been done before, and few people have attempted landscapes in colored wools. She says that she cannot paint and has no other interest in art, yet her Australian scenes and misty-green English landscapes appear at a distance to be done in oils.

Indian Harvest Time

Meant Season For Hunting And Festivities Would Soon Start

Autumn was the time at which the Indian warriors returned from raiding enemy camps and the traders from traffic with their allies. The women of the tribe by now were busily engaged in harvesting the maize and storing it away.

One interesting Mohave family group in the Ontario gallery of the Royal Ontario Museum shows the members hard at work, the men making bows and sap troughs, the women pounding mal into flour and weaving baskets. All looked forward to the time when the fall tasks were completed, and the rest of the year could be devoted to hunting, fishing and festivities.

The Babylonians had a numerical system based on 60 instead of 10.

It Makes You Feel So Much Better

The Vitamin B Tonic

Extends your life, relieves indigestion, nervousness, anæmia, chronic fatigue, and restores your nervous system.
